G Hair Water G Heat Guard

Q & A

How is ANTI-FRIZZ BY YUKO® different from the YUKO Hair Straightening?

ANTI-FRIZZ BY YUKO®		YUKO Hair Straightening
Q: What kind of results can be expected?	A: The treated hair will be smoother and more manageable. The wave patterns will become looser and it will retain some body and waves.	A: The treated hair will be permanently straight. Hair will look shiny and healthy.
Q: What ingredients are in the solution?	A: The main active ingredient of ANTI-FRIZZ BY YUKO® is Thioglycerin. Our solution also contain natural ingredients from silk, soy, wheat, meadowfoam and palm oil. Our solutions do NOT contain formaldehyde, formalin or any other chemicals that can release harmful gases.	A: The main active ingredient of YUKO Hair Straightening is Ammonium Thioglycolate. It is a common and safe ingredient found in many hair straighteners and permanent wave solutions.
Q: Are there any health concerns when doing this treatment?	A: ANTI-FRIZZ BY YUKO® has a minimal scent and will not irritate the eyes, nose, mouth or lungs. There are no harmful fumes, therefore no need to wear protective masks.	A: YUKO Hair Straightening has a minimal scent and will not irritate the eyes, nose, mouth or lungs. There are no harmful fumes, therefore no need to wear protective masks.
Q: How does this treatment work?	A: ANTI-FRIZZ BY YUKO® utilizes 2 solutions for the desired results. The 1st solution softens the hair bonds, and the 2nd solution coats the newly softened hair with natural ingredients while depositing proteins into the hair.	A: YUKO Hair Straightening utilizes 2 solutions for the desired results. The 1st solution cuts the cystine bonds of the hair and the heat from a flat iron reconnects the bonds to form the straight hair. The 2nd neutralizer stabilizes the bonds and balances the pH.
Q: How long does this treatment last?	A: The treatment will last on average 3 months and the hair will slowly regain some body.	A: The treated portions of the hair will remain permanently straightened.
Q: Does this treatment work on any type of hair?	A: This system is most effective on processed and damaged the hair. This treatment can be performed on hair with relaxer, Brazilian/Keratin treatment and Japanese hair straightening as well.	A: The service is most effective on healthy to less damaged hair with even porosity. We do not recommend getting this treatment on highly damaged hair, or hair with relaxer or Brazilian/Keratin treatment.
Q: How is this treatment different from Brazilian/Keratin treatments?	A: ANTI-FRIZZ BY YUKO®, unlike the Brazilian/Keratin treatments, does not contain formaldehyde, formalin or many other chemicals that can release harmful gases. The procedure for ANTI-FRIZZ BY YUKO® utilizes 2 solutions, while most Brazilian/Keratin treatments use only 1 solution.	A: YUKO Hair Straightening is a non-toxic, permanent hair straightening system. Our solution physically changes the structure of the hair to be straight. Brazilian/Keratin treatments temporarily relax and coat the hair.
